NEW DOUBLE MOCKORANGE

2 to 3 feet.....	\$1.50
3 to 4 feet.....	2.00
4 to 5 feet.....	3.00

This new Double Flowering Mockorange produces an abundance of pure white fragrant blossoms in June and early July. The shrub is very hardy and fast growing, and will thrive in ordinary soil—in sun or partial shade. It may be allowed to reach its ultimate height of 6 to 8 feet, or kept lower by trimming.

SPRING BULBS

Tuberous Rooted Begonias

GIANT DOUBLE CAMELLIA FLOWERED

These are the largest type and the most popular. The blossoms resemble giant double Camellias, Peonies, Roses, and sometimes even Water Lilies. They vary in size from 3 inches across to 8 inches across.

Tuberous Rooted Begonias are very valuable for the hard-to-fill shady spots in the garden, blooming all summer and into the fall. They are easy to keep through the winter by storing in vermiculite.

They come in rich shades not found in any other flowering plant.

Colors—Dark Red, Scarlet, Pink, Orange, Copper, Salmon, White, and Yellow.

3 for \$1.00

6 for \$1.75

Also Potted Begonias—75c and \$1.00

ALL OUR EVERGREENS ARE GROWN AT THE NURSERY

Each one is carefully dug and balled by hand, thereby assuring you
of a minimum of disturbance of the root system.

PLANTING DIRECTIONS FOR EVERGREENS

Dig hole a foot larger and deeper than ball of earth on evergreen. Set tree a little lower than it stood in nursery, leaving the burlap around the ball of earth. Fill around ball with rich soil, pack firmly and fill hole with water. When settled, fill hole with soil, pack firmly, and leave top of ground covered with loose earth. Water well twice weekly.

Fertilize with well rotted cow manure and bone meal.
